- ¥ Weddings

Place your Luminarias along

- ¥ Walkway
- ¥ Driveway
- ¥ Sidewalk

- ¥ Patio/Deck
- ¥ Porch
- ¥ Pool
- ¥ Picnic Area
- ¥ Waterway

Helpful Tips!

Fill the LumaBase with water or sand to provide the necessary weight to keep the Luminaria upright.

When lighting the candle, tilt the bag and base to the side.

Space the Luminarias evenly apart. You can use the lines on the sidewalk as a guide.

When storing water filled LumaBases, add a few drops of dish soap to prevent water discoloration.

We recommend using outdoor candles or tea lights in a tin cup. These can be found at grocery and hardware stores.

Do not use votive candles with the LumaBase. The low melt point of the votive candle will cause the wax to melt before burning.

Burn time can vary depending on weather conditions.

Note: The LumaBase is made of plastic. A nonflammable additive is used to prevent the plastic from burning. However, the plastic Base can melt with direct heat.
